

Activity idea for linking to Saddler's resources

Tools identification activity

Main focus of activity:

- To identify the different tools that are used by the saddler in the workshop
- To be able to explain the role of these tools in the saddler's restoration

Links to curriculum:

KS 2 Design and technology –

Knowledge and understanding of:

(How a craftsperson)..... selects appropriate tools and techniques for making their product

- a. (How a craftsperson)..... measures, mark outs, cuts and shape a range of materials, and assembles, join and combine components and materials accurately

Activity outline:

- Use the saddler's video clip as a starting point for this activity and ask the class to write down as they watch and quickly sketch any tools that the saddler uses in her job.
- Compare each other's notes and names of the tools so that the class all are clear about each tool and the role of each tool.
- Pupils can then complete the 'saddler's tools' resource where they can draw a more accurate illustration of the tool and in the other box write a brief description of how that tool is used by the saddler.
